Art Unit: 3643

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a needle, classified in class 604, subclass 187.
- II. Claims 6-8, drawn to an apparatus for delivering a predetermined volume of fluid through a hollow needle of an egg injection device, classified in class 119, subclass 6.8.
- III. Claim 9, drawn to an apparatus for sanitizing an egg injection device including an injector assembly, classified in class 119, subclass 6.8.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I could be used on humans to inject drugs into the body, Invention II could be used to dispense various types of fluids into the blood stream of a human, and Invention III could be used to clean dirty needles. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Joseph P. Katrick on January 22, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3643

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Price whose telephone number is 703-308-2694. The examiner can normally be reached on Mon, Tues, Thurs & Fri 6:30a.m. to 5:00p.m..
